Table Tennis

Ping Pong Table, for indoor and outdoor use.

A compact table tennis table that is easy to move, simple and safe to store and handle.

Available in an Indoor version with an 18 mm thick chipboard playing surface, or an Outdoor version with a 4 mm thick laminated resin tabletop with anti-glare coating, supported by a sturdy frame made from Aluzinc® (a corrosion-resistant alloy of steel, aluminium and zinc characterised by exceptional strength and durability) 35 mm thick for the Indoor version and 40 mm thick for the Outdoor version: in both cases, the ball's bounce will be perfectly suited to training or recreational use.

The table tennis table features 8 locking points, in accordance with the safety requirements of current regulations: the system ensures that the two playing surfaces remain perfectly horizontal in the playing position and vertical when the table is stored, and is activated by simply pressing buttons on the sides of the table.

Each table is fitted with storage options for balls (both models) and rackets (Outdoor model only), legs with a diameter of Ø25mm and an adjustable foot with a diameter of Ø50mm, and wheels for manoeuvring (with a diameter of Ø150mm for the Indoor version and larger Ø200mm for the Outdoor version).

Once the packaging has been opened, simply adjust the net tension and the leg feet to ensure the table is perfectly level, thereby creating the ideal conditions for play: both operations are made particularly simple

Complies with the UNI EN 14468-1 standard, Class D, and has FFTT (Fédération Française de Tennis de Table) approval for leisure use, which specifically identifies tables intended for recreational, amateur and hobbyist use.

Please do not hesitate to contact us if you are looking for a model more suited to official competitions or professional use.

Visit our 'Table Tennis' section for more information.
