Monotubular and Lattice Basketball or Minibasketball System

Fixed monotubular steel basketball system, freespace 165cm, model College

Monotubular steel basketball system, fixed.

One system consists of two complete structures.

Each structure has a backboard support made of 15x15cm square tubing and reinforced by two Ø40mm round tubing tie rods mounted on a 130x165cm rectangular base made of 40x80mm rectangular tubing; the backboard is fixed to a reinforcement frame attached to the structure by means of a system that allows it to be adjusted in height and angle, adapting it to uneven floors.

180x105 cm backboards screen-printed in black and white, regulation basket rings and nets included.

The bases, which are specially designed for this purpose, must be fixed to the ground with anchors specific to the type of flooring (not included).

All components are supplied unassembled for ease of transport.

Indoor version, item 4254: painted structure, wooden backboard (item 4050), regulation basket rings (item 4016) and nets (item 4020).

Outdoor version, item 4501: hot-dip galvanised structure, melamine resin backboard (item 4051), regulation basket rings (item 4004) and nets (item 4020).

Available: pair of front guards (item 4269).

Visit our "Basketball and Mini-basketball Systems" section for more information.

Visit our "Accessories for Basketball and Mini-basketball Systems " section for more information about backboards, basket rings, nets, protections and more.
