Tennis Systems and Nets

Tennis system made of painted aluminum, with round posts measuring Ø120mm in diameter.

Art. 7505

The system consists of a pair of posts made from painted aluminum with a round cross-section of Ø120mm in diameter and a height of 1.1 metres from floor level.

Secured to the floor using concrete-set sockets (excluding caps, which must be ordered separately).

One post features a net-tensioning winch and attachments for securing the net using a rod inserted vertically through the mesh.

All the mechanisms for tensioning the net are housed inside the posts.

Net not included.

Visit our ‘Tennis" section for more information.
