Tennis Systems and Nets

CERTIFIED UNI EN 1510

Painted aluminum tennis system with oval-section posts measuring 120x100mm, UNI-EN 1510 certified.

Art. 7506

This system complies with the standard **UNI EN 1510:2005** and corresponds to type 1 “with ground sockets”.

The system consists of a pair of posts made from painted (colour: green) aluminum with an oval cross-section of 120x100mm and a height of 1.1 metres from floor level.

Secured to the floor using concrete-set sockets (complete with plugs).

One post features a net-tensioning winch and attachments for securing the net using a rod inserted vertically through the mesh.

All the mechanisms for tensioning the net are housed inside the posts.

Supplied with carabiners for attaching the net.

Net not included.

Visit our ‘Tennis" section for more information.
