Equipment for Field Maintenance and Barrier Network

Reinforcement edging (for fencing nets), diameter Ø6mm.

Art. 6472

Reinforcement edging (for fencing nets) made of high-tenacity HD polyethylene, rope diameter Ø6mm, weight 0.010kg/m, UV stabilised, water repellent.

Machine-stitched around the perimeter of the fencing nets as reinforcement and to facilitate its installation on structures.

Colour: white, green or black according to the type of fence to be reinforced.

Suitable for our fencing and protection nets (items 6470 and 6471).

Available: hooks for fixing fencing nets (item 6473) and galvanised steel cable (item 6474) for securing the nets.

Visit our 'Balls, Training Equipments and Other Accesories for Football and Futsal' section for more information.
