Other Basketball or Mini-basketball Systems

# Half basketball or mini-basketball system, portable on wheels with refillable base, 110x73cm backboard, made in Italy

**Art. 4220**

Half monotubular basket system, freespace 60cm, on a refillable base with wheels.

Single structure consists of a three-section painted steel column with a round cross-section and a diameter of Ø80mm, equipped with a safety locking system. It is fixed to a fillable base made of polyethylene in the shape of a basketball, measuring 107x75x45(h) cm, treated to be weatherproof for outdoor use.

The base can be filled with 105 litres of water or 160 kg of loose sand, can be anchored to the floor and is equipped with two Ø100 mm wheels for easy transport. The underside features a compartment for storing all the parts of the set, making it compact when disassembled.

The unit is completed with an American-style (oval) 110x73cm ptopylene backboard which is highly resistant and fully ribbed on the back to reinforce its solidity, including the ring and net (centre holes for fixing the basket 115 mm horizontally and 110 mm vertically); two tie rods reinforce the backboard to reduce vibrations.

The playing height is adjustable up to 3.05 m.

The portable basketball set is easy to assemble and is packaged in a box measuring 120x74x45(h) cm, weighing 38 kg.
