

Volleyball and Minivolleyball Systems with Fixing Plate

## Trellis volleyball system with tie rods, aluminum, oval post 120x100mm, with ballast device.

Art. 5024

Trellis volleyball system with tie rods and ballast device with manually adjustable sliding mechanisms for positioning the net.

System consisting of poles made with oval section aluminium profile 100x120mm with internal ribs, with internal joints and reinforcements in thick special alloy aluminium 6005; compact tie rods and anti-torsion steel ground mounting plate; equipped with wheels for transport (only possible by removing the ballast devices).

All net adjustment mechanisms are inside the pole, making the system completely safe.

Plate fixing using anchors specific to the type of pavement (not included): center distance of holes with a diameter of  $\varnothing 15$ mm possible between 38cm and 54cm.

Manual sliding mechanisms with handwheel closure for adjusting the height of the net and self-braking winch with strap and removable crank for adjusting the tension of the net.

Metallic gray paint finish and equipped with snap hooks for attaching the net.

A frame is installed on the back of the plate for securing two 90x30x30cm containers made of painted steel, which act as ballast to prevent the pole from being anchored to the ground: we recommend filling the containers with at least 150kg of solid material per pole.

Available: wide selection of nets (visit the '[Nets and Accessories for Volleyball and Minivolley Systems](#)' section).

Available: pair of system protection pads (item [5412](#)).

Available: pair of ballast device protection pads (item [5406](#)).

Visit our '[Volleyball and Minivolleyball Systems](#)' section for more information.

Visit our '[Accessories for Volleyball and Minivolleyball Systems](#)' section for more information about nets, protective covers and more.

## Caratteristiche:

**FRAME TUBE:** OVAL 120x100mm

**NET HEIGHT ADJUSTMENT:** 200cm-250cm

**INSTALLATION:** Plate or Ballast
