Equipment for Training and Playing Volleyball and Minivolleyball

Volleyball wall simulator on a ballasted base with self-locking wheels.

Art. 5081

Volleyball wall simulator on a ballasted base with self-locking wheels.

Equipment consisting of a vertical support made of galvanised steel tubing with a diameter of Ø70mm and a length of 3m and a covered panel measuring 80x105x10cm, which can be positioned as desired with height and angle adjustment by means of a sliding and lever system.

The wall surface consists of a panel with an irregular, non-visible surface, which causes the ball to bounce at unpredictable angles, significantly increasing the effectiveness of training in the attack coverage phase.

Visit our 'Balls, Equipment for Training and Playing Volleyball and Minivolleyball and Other Accessories' section for more information.
