

Equipment for Field Maintenance and Barrier Network

Line marking machine by roller, liquid paint, line width 10 cm.

Art. 6430

Line marking machine by roller, suitable for all types of turf thanks to its high manoeuvrability, easy to use and quick and easy to clean after use.

The frame is made of painted sheet metal, the side wheels are inflatable tyres with a diameter of Ø26cm and the handlebar is height adjustable: features that allow for better stability and ease of use in all conditions.

The marking system consists of three aluminium rollers (draft, application and transfer) and an adjustable brush that allows you to increase or decrease the amount of paint to be applied.

The outer application roller has a scraper blade that keeps it clean in muddy conditions or when there are grass or leaf residues.

Available: concentrated eco-friendly paint (item [6492](#)).

Visit our '[Balls, Training Equipments and Other Accesories for Football and Futsal](#)' section for more information.
