

Inflatable dummy with weighted base. Height 175 cm.

Art. 6465

Inflatable dummy ideal for simulating a barrier for training set pieces in football and exercises with obstacles and slaloms. The target, when hit by the ball or bumped by players, returns to an upright position on its own.

Shape with upper part in air-inflatable polyurethane and PVC base that can be filled with water.

Total height 175 cm, base diameter Ø45cm and weight approx. 11kg (filled with water).

Also available in a 205cm height version (item [6466](#)).
