

Equipment for Field Maintenance and Barrier Network

Reinforcement edging (for fencing nets), diameter Ø6mm.

Art. 6472

Reinforcement edging (for fencing nets) made of high-tenacity HD polyethylene, rope diameter Ø6mm, weight 0.010kg/m, UV stabilised, water repellent.

Machine-stitched around the perimeter of the fencing nets as reinforcement and to facilitate its installation on structures.

Colour: white, green or black according to the type of fence to be reinforced.

Suitable for our fencing and protection nets (items [6470](#) and [6471](#)).

Available: hooks for fixing fencing nets (item [6473](#)) and galvanised steel cable (item [6474](#)) for securing the nets.

Visit our '[Balls, Training Equipments and Other Accesories for Football and Futsal](#)' section for more information.
