Shoe washing machine for sports on grass pitches.

Art. 6510

Shoe washing machine for sports on grass pitches.

The shoe washer is a device that quickly removes mud and dirt from shoes and boots.

Spray system equipped with four functional crossed water jets with adjustable angle, four nylon bristle brushes and plastic support included (two lower ones with shorter and stiffer bristles to completely remove mud and dirt from the sole, and two side ones with longer and softer bristles to clean without damaging the upper part of the shoe or boot).

The shoe cleaner is equipped with an ergonomically shaped hand rest fixed to the structure, allowing the user an easy and secure grip.

The structure also has four holes for fixing to the ground.

It is recommended to place the shoe cleaner near a drain grate.

Body and support components in 2mm thick sheet steel, shaped removable hand rest support in tubular steel with a diameter of Ø25x1.2 mm.

Powder coating for outdoor use, green colour, lead-free in compliance with current environmental anti-pollution regulations.

Two side brushes measuring 250x100mm and two lower brushes measuring 150x50mm, with nylon bristles.

Four-jet spray unit with adjustable angle, components in galvanised steel.

Supplied with steel clamp for connecting 15x21mm hose (not supplied) to the water supply.
